

Microsoft Dynamics 365 for Discrete Manufacturing

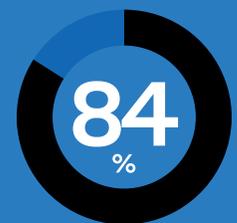

Thinkmax and Microsoft Dynamics 365 can help companies maximize productivity, profitability and ensure a steady cash flow from production operations while managing change and controlling the risk.

As manufacturing raw material costs increase, companies consolidate and global competition increases, the pressure on senior executives intensifies to ensure profitability. Poor visibility and control over production costs, risk, and performance can severely damage profitability. Organizations need to deliver maximum value and quality to the customer, increase productivity, decrease waste, and empower employees to work smarter.

Industry Trends and Challenges

18% average productivity gain from smart factories seen by manufacturers

84% of manufacturers said that selling products as services would increase profits

29% of tasks today are completed by machines, will be 71% by 2025

#1 use case for AI for enterprises across manufacturing is predictive analytics

Key Benefits of a Modern ERP Suite

Optimize Operations

Streamline processes and data for a unified view of the business across:

- Finance
- Procurement
- Supply Chain
- Manufacturing
- Sales
- Service
- Marketing

Gain Real-Time Visibility

Leverage end-to-end data visibility to:

- Gain real-time insights into entire production process
- Deliver maximum value and quality to customers
- Increase profitability
- Reduce errors and waste

Engage Customers

Microsoft Dynamics 365 provides the platform to:

- Measure customer satisfaction metrics with specific products
- Determine growth demand in certain geographies
- Ensure that the supply chain is optimized to fulfill that demand

Transform Products

Take control on the manufacturing lines to:

- Maintain real-time quality as products are being produced
- Make changes on the fly if there are issues
- Increase margins and waste reduction

Empower Employees

Retain your most valuable assets with right tools to:

- Collaborate and share insights
- Create a more connected and effective organization
- Proactively manage operations effectively with predictive analytics

Why choose Dynamics 365 for discrete manufacturing?

Microsoft Dynamics 365 powers a more resilient future for discrete manufacturers in the new and next normal by delivering value for the business, optimizing operations and deepening customer relationships.

Connected operations and unified customer experiences

Unified operations for a unified vision across the business leads to intelligent, proactive decision making, value-added experiences, and a sustainable business.

Why choose Thinkmax?

We deliver

100% implementation projects delivered.

We take ownership

20% of Thinkmax' projects are "rescues" where we recovered failing implementations.

We innovate

Dynamics 365 configurations to accelerate deployment in a multi-company/division project.

We think outside the box
