

Business Applications & ERP, the New Normal

Business applications and ERP systems are not the big, black boxes they used to be.

Modern technologies and cloud are now mainstream and bring a new way to tackle an ERP implementation.

With the Microsoft Dynamics 365 platform, your organization can prioritize implementing the business applications and ERP capabilities you need to unify, standardize, and automate day-to-day processes, with intelligence, transparency and added functionality for long-term growth.

6 ways to drive faster time to value with Microsoft Dynamics 365

Speed & Agility

In a world of digital disruption, having prebuilt, unified solutions enable you to rapidly adapt to changing customer needs, market demands, trends, and unpredictable events.

Increase ROI

A modular ERP system means you can prioritize implementing the most critical systems to improve operational efficiencies and value-added customer experiences and grow as you go.

Reduce TCO

With a secure and unified ecosystem, the backend is significantly easier to manage, operations are streamlined, and consistent user experiences ensure greater productivity.

Real-time Intelligence

Unified data across the organization brings accurate business intelligence to light, enabling a proactive approach to solving problems and optimizing experiences that differentiate your business.

Security and Compliance

All Dynamics 365 products and services are built on the Azure cloud, offering the same world-class security, privacy, and compliance protections that 95% of Fortune 500 companies use.

Innovate & Compete

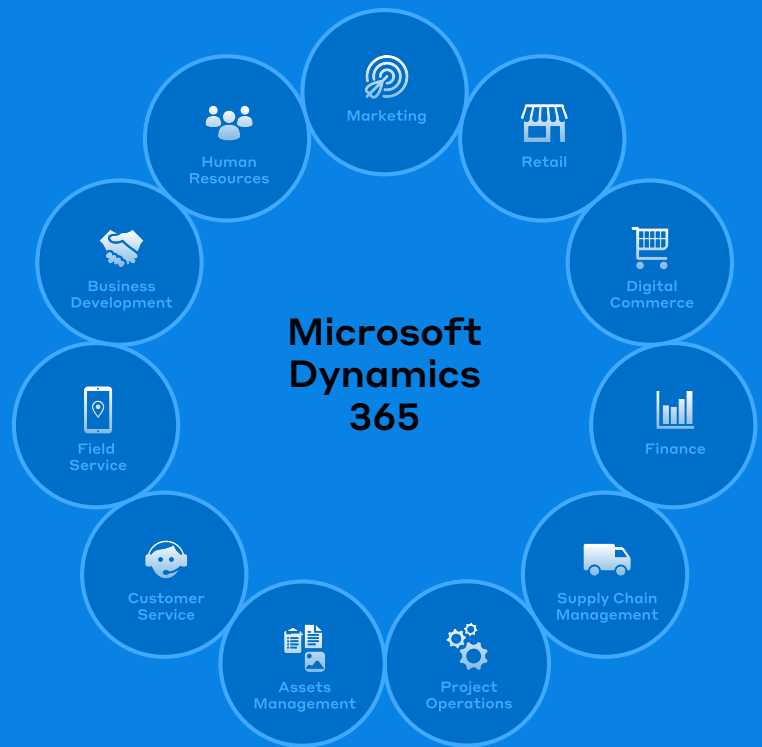

Always be ready to scale and evolve your business and offer exceptional customer experiences with the latest tools and emerging technologies that easily integrate with your Microsoft ecosystem.

Why choose Microsoft Dynamics 365?

Microsoft Dynamics 365 powers a more resilient future for discrete manufacturers in the new and next normal by delivering value for the business, optimizing operations and deepening customer relationships.

Connected Operations and Unified Customer Experiences

Unified operations for a unified vision across the business leads to intelligent, proactive decision making, value-added experiences and a sustainable business.

Why choose Thinkmax?

We deliver

100% implementation projects delivered.

We take ownership

20% of Thinkmax's projects are "rescues" where we recovered failing implementations.

We innovate

Dynamics 365 configurations to accelerate deployment in a multi-company/division project.

We think outside the box
